

Dear Colleagues,

Please find attached the organizational committee proposal for our future Military Medical event (conference, workshop ...) main topics and issues for discussion on our preparatory meeting.

The main objective of the event we proposed to be focused on “Medical Civil Military Cooperation and Coordination”

The topics we propose for discussions are the following:

1. Military Medical Capabilities for other than wartime (operational) utilization – army, air, marine, naval prospective
2. Military medicine involvement in the disasters medical management and support –presenting the military medical specialist role into recent disasters and humanitarian crises – national and international prospective
3. Civilian medicine expectation for military medicine support in case of disasters and crises
4. The comprehensive approach impact on military medical support planning and execution
5. Military and civilian healthcare systems integration – national and international prospective
6. Incident Command – the place and role of the military medical specialists
7. Training and preparation – Military specialist in the civilian system and vice versa:
 - Information sharing;
 - Equipment;

- Certification and credential
- Multinational approach

Second main issue is to define the level of the forum:

- National with international participation or
- International.
